

Detailed explanation of the topic of the internship and the activities that will be done by the student

Elements that must appear are:

- a. Link with the Sustainable Development Goal(s) and the global EU GREEN vision

<https://eugreenalliance.eu/mission-vision/>

<https://sdgs.un.org/goals>

- b. Missions of the students (with links to both research and training)

SDG – 2 Reduce the hunger issue by following ways:

- 2. avoiding food wasting by assessing the quality of foodstuff and personalized nutrition,
- 3. reuse and recycling of foodstuff and food waste,

SDG – 6 Clean water and sanitation

- 4. providing safe and high quality water by assessment of microplastics in drinking water,
- 5. valorization of waste water,

SDG – 12 Responsible consumption and production

- 6. avoiding waste of raw materials by zero errors in the production chain,

- c. Conditions of the internship (location, potential compensation or advantages)

The activities will be carried out in Oradea during the second semester of academic year 2025 – 2026.

There is available accommodation in dormitories.
